## Full Bioclear Method (Anterior & Posterior Composite)

August 11- Entertainment program and free time.

### Anterior Core:

Level 1.0 & 3.0 Anterior Solutions: Introduction to the Bioclear Method is a 2-day course designed to give you all the tools you need to be able to use the Bioclear Method for everyday composite restorations.

Training day 1: Level 1.0 – Injection Molding Technique for Modern Composite Dentistry

This Course will focus on the introduction of the injection molding composite technique using heated composite materials and the mirror finish polishing technique.

Training day 2: Level 3.0 – Advanced Anterior Solutions

The focus will be on adult dentitions as an alternative to porcelain crowns and porcelain veneers.

### Posterior Core:

Level 2.0 & 4.0 Posterior Solutions: Core Posterior is a 2-day course designed to give you all the tools you need to be able to use the Bioclear Method for everyday posterior composite restorations.

Training day 3: Level 2.0 – Introduction to Posterior

The Introduction to Posterior Solutions course introduces the Clark Class II and the “Calla Lily” cavity designs. During the course the instructor will illustrate the importance of creating ideal surfaces for bonding as well as cavity design to avoid ditching and crack propagation. The techniques taught in this course will give participants the skills to create composites that increase the longevity of the tooth.

Attendees will perfect treatment of back to back Clark Class II (Non-Retentive Saucer Prep) and discover the benefits of the new opportunistic Class II. The course will include a full review of matrix wedging options and the advantages of modern separators will be discussed. Additional instruction will include the replacement of existing restorations to provide increased structural integrity of the teeth.
